

Breathing protection system with compressed air supply

## Best breathing air. Any place.

The perfect fresh air supply for working in critical environment optrel suppliedair

## **Great Connectivity**

Two different connection nipples are available for connection to all common compressed air systems.

Air flow	160 to 250 nL/min
Minimum flow rate	160 nL/ min
Pressure range	4 to 10 bar
Weight	280 g
Noise level	max. 70 dB(A)
Operating temperature	+10°C to +40°C
Humidity range	20% to 80% RH
Belt size	60 – 150 cm
Audible alarm in case of p	oressure loss

## Ideal for:

- Welding
- Plasma cutting
- Grinding applications
- Gouging
- Metalworking
- Foodstuffs industry
- Paint shops
- Chemical industry

Compatible with all optrel fresh air helmets

## Individually adjustable air distribution

optrel fresh air helmets have a continuously adjustable rotary switch that lets you route up to 20% of the air to the forehead area for additional cooling. This avoids a direct draught over the eyes and the dehydration of the eyes associated with it.
